

Technical drawing of a reinforced concrete frame structure, showing a cross-section and elevation view. The structure consists of a series of vertical columns and horizontal beams. The drawing includes various labels indicating the placement and type of CFRP (Carbon Fiber Reinforced Polymer) reinforcement:

- CFRP B=20cm in quattro strati interno**: Internal CFRP reinforcement in four layers.
- CFRP B=20cm interno**: Internal CFRP reinforcement.
- Fiocchi di collegamento interni**: Internal connection stirrups.
- Superficie ad accesso impedito dall'esterno**: Surface inaccessible from the exterior.
- CFRP B=20cm in doppio strato**: Double-layer CFRP reinforcement with B=20cm.
- CFRP B=40cm in doppio strato**: Double-layer CFRP reinforcement with B=40cm.
- CFRP B=50cm in doppio strato**: Double-layer CFRP reinforcement with B=50cm.
- CFRP B=25cm in quattro strati**: Four-layer CFRP reinforcement with B=25cm.
- risvolto CFRP B=40cm di copertura**: CFRP reinforcement of the roof overhang.
- CFRP B=20cm**: CFRP reinforcement with B=20cm.
- Giunto verticale**: Vertical joint.
- Flocco di collegamento**: Connection stirrup.
- 1+1CFRP B=20cm (interno/esterno)**: One internal and one external CFRP reinforcement with B=20cm.
- 1+1CFRP 50x50cm (interno/esterno)**: One internal and one external CFRP reinforcement with dimensions 50x50cm.
- 1+1CFRP B=20cm (interno/esterno)**: One internal and one external CFRP reinforcement with B=20cm.
- 1+1CFRP 50x50cm (interno/esterno)**: One internal and one external CFRP reinforcement with dimensions 50x50cm.
